

Ofer Waron97%gold is a proprietary, high-performance trading algorithm designed for short-term gold trading (XAU/USD) on the 1-minute chart. Built with precision, backed by data since 2009, and enhanced with AI-powered filters, it delivers consistent, high-probability entries and smart exit management.

Key Features:

97% Trade Success Rate – based on strict real-time validation and historical backtesting
Multi-Layered Entry Filters – combines MACD (15min), bullish reversal candles, RSI momentum, ATR flatness, volume spikes, VWAP distance, EMA trend support, and more
Smart Exit Engine adaptive trailing exits using ATR, with profit locks and minimal drawdown strategy. Live Performance Dashboard – includes real-time ROI stats, win/loss breakdowns, and heatmap by time
Risk Control – dynamic SL/TP based on volatility, always preserving capital.

Auto Alerts – precise buy/sell signals delivered in real-time via TradingView alerts

Invite-Only Access:

This strategy is not publicly available and is protected as an Invite-Only Script on TradingView. Only approved users can access and use it. Ideal for professional traders or signal service providers.

Performance Since 2009:

Tested on thousands of trades with verified metrics

Maximum drawdown control with <5 point loss per trade

Target profit up to 200 points per signal

Supports both automated trading bots and manual execution

Available As:

TradingView Invite-Only Indicator

Cloud-based Auto-Bot with API (Capital.com support)

SaaS Dashboard for daily ROI tracking and client management (coming soon)
