Ofer Waron97%gold Automated Algorithmic Trading Engine. This system is an automated, multi-layered algorithmic trading engine engineered specifically for Gold markets on a 4-hour timeframe. It integrates automated trade execution, risk management parameters, multi-variable analytical scoring, and external webhook alerting.

⚙️ Core Operational Components:

The architecture consists of five core operational components:

Analytical Confluence & Scoring Engine – Evaluates market conditions across multiple technical dimensions to calculate a continuous score before granting entry clearance.

Hard Real Entry Gap Lock – Enforces strict cooldown and separation periods between consecutive trades (configurable via hours or candle counts) to filter market phases and manage trade frequency.

Automated Risk & Trade Management – Configures precise point-based profit targets, stop-loss thresholds, and automated break-even/protection levels to secure open positions.

Webhook Alert Integration – Formats structured JSON payloads to dispatch real-time alert notifications (covering entries, protection triggers, and trade exits) directly to designated external channels or communication groups.

Backtest Analytics & Dashboard – Features an on-screen performance dashboard that tracks historical execution stats, individual trade timestamps, and cumulative net financial results using localized currency tracking.

⚠️ Disclaimer & Terms of Use:

All content, signals, and analyses published in the gold trading group reflect my personal opinion only, for informational purposes, learning, and knowledge sharing.

They should not be viewed as investment advice, a recommendation to execute transactions, an inducement to invest, or a substitute for personalized professional investment advice.

Every trading decision is under the user's sole responsibility. Trading in the capital market and commodities involves a significant risk of financial loss, including the loss of all capital.

Signals are provided for free, without any commitment to accuracy, profit, or any outcome. Ads or promises of returns should not be construed.

✅ Agreement:

Joining and using the content constitutes agreement to these terms.
